PROFESSIONAL SUMMARY

Information Systems undergraduate (GPA 3.80/4.00, Semester 6) and Full Stack Developer with hands-on experience building, deploying, and operating production web applications end to end. Independently built and currently operates UriHangug, an EPS-TOPIK learning platform serving 1,000+ registered users and 3,000+ practice questions. Experienced with Next.js, Node.js, Laravel, PHP, MySQL, REST APIs, Git, Linux/VPS, and third-party integrations. Seeking to contribute to DKatalis as a Tech Intern within a cross-functional full-stack engineering environment.

TECHNICAL SKILLS

Programming: JavaScript, PHP, Python, Java, HTML5, CSS3

Frontend: Next.js, Tailwind CSS, responsive design, mobile-first development

Backend & APIs: Node.js, Laravel, PHP Native, CRUD applications, REST API integration

Data & Integrations: MySQL, Midtrans Payment Gateway, Discord API

Deployment & Tools: Linux, VPS, cPanel, Vercel, Git, GitHub

AI Development Tools: Claude Code, Codex, Gemini CLI

EXPERIENCE

Full Stack Web Developer Intern | SMK Al-Hidayah Lestari

2026 | 1 month

Laravel, MySQL | South Jakarta, Indonesia | smkalstar.sch.id

- Developed and launched the school's official website and student admission (SPMB) system using Laravel and MySQL, covering public information pages and authenticated admission workflows.
- Built applicant registration and login, academic calendar, announcement checking, and an admin CRUD dashboard for real-time content and applicant data management.
- Delivered responsive, mobile-friendly interfaces and production-ready web features from implementation through launch.

SELECTED PROJECTS

Independent Full Stack Developer | UriHangug - EPS-TOPIK Learning Platform

Mar 2026 - Present

Next.js, Midtrans, Discord API | urihangug.tech

- Design, build, deploy, and operate an end-to-end production learning platform with a mobile-first experience, serving 1,000+ registered users.
- Built an interactive quiz engine, persistent learning progress, premium access, affiliate flows, Midtrans payments, and Discord community integration.
- Manage 60+ learning materials and 3,000+ practice questions across structured Korean-language learning paths, with production deployment experience on VPS/Linux and Vercel.

Independent Web Developer | IMSISFO ITB Ahmad Dahlan Organization Portal

2025 - 2026

PHP Native, MySQL | imsisfo.org

- Built and maintained the official student-organization portal with searchable leadership structure, programs, accountability reports, news, agenda, gallery, contact, and member registration.
- Used a lightweight PHP/MySQL architecture to simplify maintenance and future handover.

EDUCATION & LEADERSHIP

Bachelor's Degree in Information Systems | ITB Ahmad Dahlan Jakarta

2023 - 2027 (Expected)

GPA 3.80/4.00 | Semester 6 | South Jakarta, Indonesia

- Academic focus: full-stack web development, information systems, database applications, API integration, and AI-assisted software development.

Staff, P3SI Department | IMSISFO ITB Ahmad Dahlan

2025 - 2026

Student organization

- Supported department programs and strengthened the organization's digital presence through continuous website development and maintenance.
